

Working Safely

The following steps are being followed to protect the safety of both the electrician & the household.

- No work will be carried out in a household which is isolating (unless emergency work is required)
- Electrician will wear appropriate PPE available (mask & gloves)
- Prior arrangements will be made with customers to avoid face-to-face contact (eg. answering the door & making payment)
- Arrangements will be made to minimise movement around the property of both electrician and residents
- 2m distance must be kept at all times
- Where possible all internal doors should be left open to prevent touching door handles
- Electrician will bring their own food and drink, taking breaks outside where possible
- Where possible all waste will be removed from the property by the electrician
- Frequent cleaning of surfaces that are touched
- Invoices will be emailed, and certificates will be placed in an envelope

Thank you for your support.
